ABOUT THE AUTHORS

Dr. S. Chamundeswari currently the Principal of NKT National College of Education for Women, a Teacher Education Institution, has a rich experience of 28 years in the field of Education. She possesses strong interpersonal skills. An active and dynamic researcher with outstanding research credentials, she has guided a number of Ph.D., M.Phil. and M.Ed. students, has published four Books and two Book Chapters and authored 19 Reading-Learning materials. She has 59 research papers in International Journals, 13 in National Journals and 36 publications in Conference Proceedings to her credit. She was invited by the Umea University, Sweden in the Faculty Exchange Programme in 2010 and subsequently invited by the University of Passau, Germany, as a Visiting Faculty for collaborative research and delivering lectures in 2012 and 2013. In recognition of her outstanding professional credentials, she was awarded the Best Teacher Award ('Asiriyar Chemmal') in 2010 by the Thamizhaga Institute of Educational Research and Advancement (TIERA), Chennai and the Best Principal Award for recognizing her consistent contributions to development of women teachers by the Society for Educational & Entrepreneurship Development (SEED), Chennai.

Dr. V. J. Uma is currently working as Assistant Professor of Physical Science Education at NKT National College of Education for Women, a Teacher Education Institution. She has done her research in Education, M.Phil. in Physics and M.Sc., in Psychology. Has 23 years of rich experience in Education field. She has published Research Papers in International and National Journals and presented papers in International and National Conferences. She leads by example and inspires her Students and Faculty members to bring out the best in them.

Mrs. I. Akila is a Research Scholar at NKT National College of Education for Women, a Teacher Education Institution. Worked as Project Assistant in CLRI and as Teacher in SBOA, CBSE School, Annanagar, Chennai.

CTET SCIENCE PAPER II

PREPARATION & PRACTICE

Science: Paper II for the Central Teacher Eligibility Test (CTET) seeks to help candidates prepare for the subject Science in Paper II of the CTET.

KEY FEATURES

- ✓ Tables and grids for ease of comprehension and retention
- ✓ Diagrams, flow charts, and photographs to present concepts and ideas
- ✓ Key points summarised at the end of every chapter to aid quick revision
- ✓ Previous years' question papers to help identify trends and patterns of the examination
- ✓ Progress evaluation charts at the end of each section
- ✓ 300+ multiple choice (objective) questions including model test papers for practice, with answer keys for self-evaluation

WHY THE NCF 2005 IS IMPORTANT

The NCF 2005 talks about best practices for teaching.

Several questions related to the NCF 2005 have appeared in the CTET.

This book includes a simple point-wise summary of the NCF 2005.

This book includes NCF-related questions from the previous years.

R. Chamundeswari is an Associate Professor of Physical Science-Education at N.K.T National College of Education for Women. She teaches courses in the areas of Teaching of Physical Sciences, Development of Teaching Skills, Research Methodology, Philosophical and Sociological Foundations of Education, Teacher Education, and Curriculum Development. She has been a part of various outreach programs; of note is her post as a visiting faculty at the University of Passau and University of Duisburg, Germany and Umea University, Sweden.

Premalatha B. is a Science teacher at the Delhi Kannada Senior Secondary School, New Delhi. She has been teaching Science for over 24 years and has been associated with many schools across the country.

ABSTRACT

E-resources should be readily accessible to all. Before the development of computer and internet technology, printed version of resources like books, journals, dictionaries, work books, etc. played a significant role in teaching and learning process. But these printed versions are not easily accessible to all and are also expensive in nature.

Introduction

Raise awareness of the range and relevance of learning and instructional materials and media that can be used effectively in clinical teaching. Highlight examples of good practice in the use of materials, and indicate common errors that should be avoided. Provide ideas and examples for the use of teaching materials in the clinical setting to enhance student learning. Provide a foundation for developing your professional skills as a teacher in the clinical setting. Content: The principles of designing teaching materials to support teaching and learning in a variety of contexts including: the use of overhead projectors; using PowerPoint; using video in teaching and learning; resources for small group teaching; introducing problem based learning; developing study guides; supporting clinical learning with logbooks; and clinical skills laboratories.

The Use of Overhead Projectors Most lecture theatres and seminar rooms have an overhead projector (OHP) and you will certainly have seen them in use. There are however some "Do's" and "Don'ts" when preparing overhead transparencies. · Do use permanent (waterproof) pens if you intend to re-use the OHT (water soluble inks smudge very easily and detract from your presentation). · Do leave space to add to the transparency as the lecture develops; do this on an overlay or with water-soluble inks. · Do use large fonts; it will depend on the size of the lecture theatre but don't use anything smaller than 24 point. · Do use colour for emphasis for instance for a heading or key words, but. · Don't use colours that are difficult to read when projected - red, yellow and orange are particularly unsuitable. · Don't
